## Postdoctoral position on Immunobiology

The laboratory of Immunobiology at the Institute for Research in Biomedicine (IRB, Bellinzona, Switzerland) is recruiting a highly motivated postdoctoral to work at the interface between Cell Biology and Immunology. Our research focus is on understanding the mechanisms of pathogen-derived antigens presentation by the non-classical HLA-E and consequent recognition by CD8+ T lymphocytes.

For additional information on the laboratory of Immunobiology / Dr. Caroline Junqueira, please visit: [www.irb.usi.ch/immunobiology](http://www.irb.usi.ch/immunobiology)

### Qualification:

Candidates should have a Ph.D. degree with less than 3 years of postdoctoral experience and expertise in immunology, cell biology, biochemistry, or molecular biology.

Applications for the position should include a CV, one page of research accomplishments, and contact information of two professional references. For more information/applications please contact Dr. Caroline Junqueira ([caroline.junqueira@irb.usi.ch](mailto:caroline.junqueira@irb.usi.ch)). Please write "Postdoc application" and the applicant's name in the email subject heading.
