# Artificial intelligence methods applied to intravital microscopy of the immune system

Università  
della  
Svizzera  
italiana

Institute  
for  
Research  
in  
Biomedicine

IRB  
An institute  
affiliated to USI

## Organizers

- Santiago F. Gonzalez  
santiago.gonzalez@irb.usi.ch
- Diego Pizzagalli  
diego.pizzagalli@usi.ch

## Can apply

PhD Students  
Registration Open

## Supported by

IRB  
PhD program

PhD Cell Migration  
Program

USI, Biomedical  
PhD program

Immunemap  
consortia

Euler  
Institute

This program will cover theoretical and practical aspects regarding the application of new A.I. -based methods for the analysis of migration and interaction of immune cells captured by 4D intravital imaging. Basic knowledge in imaging is recommended.
